SECTION 4 – FIRST AID MEASURES						
EYE CONTACT:	Eye injuries from solid particles should receive immediate medical attention. Dust may be flushed from eyes immediately with large amounts of water, lifting the lower and upper lids occasionally; seek medical attention.					
SKIN CONTACT:	Cuts or abrasions should be treated promptly with thorough cleansing of the affected area. Wash the skin using soap or mild detergent and water. Get medical attention if irritation develops and persists.					
INGESTION:	Induce vomiting.					
INHALATION:	If breathing has stopped, perform artificial respiration and obtain medical aid immediately. If breathing is difficult, provide fresh air and seek medical attention as soon as possible.

	SECTION 11 -	TOXICOLOGICAL	INFORMA	ΓΙΟΝ		
POTENTIAL HEALTH EFFECTS	: Symptoms related	to the physical, c	nemical and	d toxicologio	cal characteristics	
Under normal handling and u	ise, exposure to proc	duct presents few	health haz	ards. Dusts	may cause mechanical	
irritations to eyes and skin. I	ngestion may cause	transient irritatior	of throat,	stomach an	nd gastrointestinal tract.	
Inhalation may cause coughing	ng, nose and throat i	rritation, and snee	zing. High	er dust expo	osures may cause difficulty	
breathing, congestion, and ch						
EYE CONTACT:	If present as dust, copper may cause irritation, discoloration, and damage. As a foreign					
	body in the lens, copper dust may cause a dense cataract and discolor the lens.					
SKIN:	Copper can cause some irritation with possible discoloration of skin.					
	Ingestion of significant amounts of welding electrodes is unlikely. If copper is					
INGESTION:	swallowed and person is conscious, give large quantities of water to drink. Get medical					
indestion.	attention as soon as possible. Serious effects may occur if large amounts of dust are					
	swallowed.					
Breathing metal dust may worsen symptoms of individuals with pre-exi						
	respiratory disease. Follow exposure guidelines for copper dust and fume. Acute					
INHALATION:	exposure to dust or fume may cause upper respiratory tract irritation, metallic taste in					
mouth, nausea, fatigue, and/or metal fume fever. Breathing copper d
