	SECTION 11 – TOXICOLOGICAL INFORMATION				
POTENTIAL HEALTH EFFECTS	: Symptoms related	to the physical, c	nemical and	d toxicologio	cal characteristics
Under normal handling and u	ise, exposure to proc	duct presents few	health haz	ards. Dusts	may cause mechanical
irritations to eyes and skin. Ingestion may cause transient irritation of throat, stomach and gastrointestinal tract.					
Inhalation may cause coughing	Inhalation may cause coughing, nose and throat irritation, and sneezing. Higher dust exposures may cause difficulty				
breathing, congestion, and ch	breathing, congestion, and chest tightness.				
EYE CONTACT:	If present as dust, copper may cause irritation, discoloration, and damage. As a foreign				
	body in the lens, copper dust may cause a dense cataract and discolor the lens.				
SKIN:	Copper can cause some irritation with possible discoloration of skin.				
	Ingestion of significant amounts of welding electrodes is unlikely. If copper is				
INGESTION:	swallowed and person is conscious, give large quantities of water to drink. Get medical				
indestion.	attention as soon as possible. Serious effects may occur if large amounts of dust are				
	swallowed.				
	Breathing metal dust may worsen symptoms of individuals with pre-existing chronic				
	respiratory disease. Follow exposure guidelines for copper dust and fume. Acute				
INHALATION:	- p				
	mouth, nausea, fatigue, and/or metal fume fever. Breathing copper dust may worsen				
symptoms of individuals with pre-existing chronic respiratory disease.
