PROCEDURES FOR HANDLING: expo insta burn		is product does not require special safety precautions for the handling ior to installation. Installation and removal of the product may cause posure to dusts and other materials or chemicals associated with the stallation (work) environment. Operations such as grinding, cutting, irning, and welding may generate dusts or fumes which may require ecial handling procedures.		
	SECTION 8 – EXP	OSURE CONTROLS/PERSONAL PROTECTION		
ENGINEERING CONTROLS:	When machining, heating, or melting, use adequate local (preferably) or general exhaust ventilation to ensure that concentrations of dusts or fumes do not exceed exposure limits. Keep workplace clean and dry (unless wet machining is being used to capture dust and fume). Train personnel to minimize exposure to hazards during installation and replacement of product. On a regular basis, verify condition and proper function of equipment in which the product will be installed.

	SECTION 11 – TOXICOLOGICAL INFO	RMATION	
POTENTIAL HEALTH EFFECTS	: Symptoms related to the physical, chemic	cal and toxicological characteristics	
Under normal handling and use, exposure to product presents few health hazards. Dusts may cause mechanical			
irritations to eyes and skin. Ingestion may cause transient irritation of throat, stomach and gastrointestinal tract.			
Inhalation may cause coughir	ng, nose and throat irritation, and sneezing.	Higher dust exposures may cause difficulty	
breathing, congestion, and ch	nest tightness.		
EYE CONTACT:	If present as dust, copper may cause irritation, discoloration, and damage. As a foreign body in the lens, copper dust may cause a dense cataract and discolor the lens.		
SKIN:	Copper can cause some irritation with possible discoloration of skin.		
	Ingestion of significant amounts of welding electrodes is unlikely. If copper is		
INCESTION	swallowed and person is conscious, give large quantities of water to drink. Get medical		
INGESTION:	attention as soon as possible. Serious effects may occur if large amounts of dust are		
	swallowed.		
	Breathing metal dust may worsen symptoms of individuals with pre-existing chronic		
	respiratory disease. Follow exposure guidelines for copper dust and fume. Acute		
INHALATION:	exposure to dust or fume may cause upper respiratory tract irritation, metallic taste in		
	mouth, nausea, fatigue, and/or metal fum	ne fever. Breathing copper dust may worsen	
symptoms of individuals with pre-existing chronic respiratory disease.
