RECOMMENDED USE AND R Spark-less Hammers	RECOMMENDED USE AND RESTRICTIONS ON USE: Spark-less Hammers					
		SECTION 2 – HAZARD IDENTIFIC	ATION			
CLASSIFICA	CLASSIFICATION: Copper hammers are spark-less and soft mallet for applying force to machiner				plying force to machinery.	
OTHER INFORMA	TION:	Fumes from hot processes may contain other compounds with different exposure limits. Dust or fumes generated by machining, grinding, welding or thermal cutting of the copper may produce airborne contaminants. Consult Sections 3 & 8 for further information.

SECTION 4 – FIRST AID MEASURES						
EYE CONTACT:	Eye injuries from solid particles should receive immediate medical attention. Dust may be flushed from eyes immediately with large amounts of water, lifting the lower and upper lids occasionally; seek medical attention.					
SKIN CONTACT:	Cuts or abrasions should be treated promptly with thorough cleansing of the affected area. Wash the skin using soap or mild detergent and water. Get medical attention if irritation develops and persists.					
INGESTION:	If the product or dust is swallowed, seek immediate medical attention or advice. Do not induce vomiting.					
INHALATION:	If breathing has stopped, perform artificial respiration and obtain medical aid immediately. If breathing is difficult, provide fresh air and seek medical attention as soon as possible.

	SECTION 11 – TOXICOLOGICAL INFO	RMATION			
	POTENTIAL HEALTH EFFECTS: Symptoms related to the physical, chemical and toxicological characteristics				
Under normal handling and use, exposure to product presents few health hazards. Dusts may cause mechanical					
irritations to eyes and skin. Ingestion may cause transient irritation of throat, stomach and gastrointestinal tract.					
Inhalation may cause coughing, nose and throat irritation, and sneezing. Higher dust exposures may cause difficulty					
breathing, congestion, and chest tightness.					
EYE CONTACT: If present as dust, copper may cause irritation, discoloration, and damage. As					
body in the lens, copper dust may cause a dense cataract and discolor the lens.					
SKIN:	Copper can cause some irritation with possible discoloration of skin.				
	Ingestion of significant amounts of welding electrodes is unlikely. If copper is				
INGESTION:	swallowed and person is conscious, give large quantities of water to drink. Get medical				
	attention as soon as possible. Serious effects may occur if large amounts of dust are				
	swallowed.				
		ms of individuals with pre-existing chronic			
INHALATION:	respiratory disease. Follow exposure guidelines for copper dust and fume. Acute				
exposure to dust or fume may cause upper respiratory tract irritation, metallic taste in					

mouth, nausea, fa	atigue, and/or met	al fume feve	er. Breathing o	copper dust may worsen	
symptoms of individuals with pre-existing chronic respiratory disease.
